EDUCATION

Texas Tech University

Master of Science, Computer Science

Aug 2023 – May 2025

GPA: 4/4

Koneru Lakshmaiah University

Bachelor of Technology, Computer Science Engineering

July 2018 – Mar 2022

GPA: 9.1/10

TECHNICAL SKILLS

Programming: Python, Java, C.

Data Science: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, Tableau, Power BI.

Cloud and Operations: AWS, GCP, Azure, Postman, Git, JIRA, SAP HANA Cloud, SonarQube.

Web Technologies: HTML, CSS, JavaScript (including React, SAP HANA XS JavaScript, and SAPUI5).

Databases and Tools: MySQL, Oracle, SQL, PostgreSQL, Microsoft SQL Server, SAP HANA, SAP HANA XS Advanced, SAP BTP Cockpit, SAP Hana Studio, SAP BAS.

Certifications: ServiceNow Certified System Administrator, Microsoft Azure SQL Fundamentals.

PROFESSIONAL EXPERIENCE

Agile Solutions, Bengaluru, India

May 2022 - Jun 2023

Software Development Engineer

- Designed and implemented web solutions, resolved critical bugs, and introduced enhancements for the Tax Intelligence and Management Platform, improving system functionality and user satisfaction.
- Played a key role in migrating the platform from SAP XS Classic to SAP XS Advanced, enabling a robust microservices architecture for better scalability and maintainability.
- Worked extensively with SAP BTP Cockpit and SAP HANA XS Advanced tools to optimize development processes and streamline application management.
- Specialized in diagnosing and resolving complex issues, enhancing user experience through effective debugging and optimization.
- Gained in-depth expertise with SAP HANA Studio and SAP BAS to support seamless application development and deployment.
- Integrated SonarQube scanning into the development pipeline to identify and resolve vulnerabilities, significantly improving system security and stability.
- Possessed expertise in using web services to integrate SAP with external systems, facilitating seamless data exchange and automation of business processes.
- Gained knowledge in creating Calculation Views in SAP HANA Studio to model complex data transformations and optimize performance for reporting and analytics.

Agile Solutions, Bengaluru, India

May 2021 - Apr 2022

Software Engineer Intern

- Contributed to enhancing the Tax Content Management (TCM) component within the Tax Intelligence and Management Platform (TIMP).
- Focused on improving the migration process of application content across different environments.
- Ensured seamless, efficient, and error-free transfer of data and settings between environments.
- Streamlined the migration process to ensure smooth transitions and reduce the risk of issues during content migration.
- Worked on the Business Correction Builder (BCB) component, which is responsible for correcting data discrepancies in either the ECC system or shadow tables. Ensured data integrity during the correction process and collaborated on efficient deployment of fixes.

ACADEMIC PROJECTS

Chatbot for Network Security Q&A

Oct 2023 - Nov 2023

Texas Tech University

- Developed a chatbot that answers user queries based on Network Security lecture notes and textbooks using LangChain, Pinecone, and Replicate.
- Trained the model using PDFs of course materials, with text splitting and embedding for efficient retrieval and more accurate responses.
- Integrated citation features to indicate whether the answer is sourced from lecture notes or the textbook, enhancing the user experience.

Railway Ticket Booking System

Jul 2021 - Dec 2021

Koneru Lakshmaiah University

- Developed a Railway Ticket Booking System using Eclipse as the software platform. The system should allow passengers to input their details and select travel points from a list of trains and stations.
- Implemented functionality for passengers to choose trains, view train details, and make bookings based on their travel requirements.
